

NEW!

NEW REBATE PROGRAM FROM THE GREEN ONTARIO FUND

SAVE \$500 PER WINDOW UP TO \$5,000!

Thanks to a new energy-saving incentive program launched by the Ontario government, Ontario residents can earn GreenOn Rebates on the purchase of qualifying high-performance windows.

Regency®

HIGH-PERFORMANCE WINDOWS

REGENCY® 400 SERIES
CUSTOM VINYL REPLACEMENT WINDOWS

HERE'S HOW IT WORKS:

1. You must live in a detached home, townhome or semi; if you rent, you must get written permission from the landlord.
2. Choose a Window Wise™ certified contractor for your purchase and installation of energy-efficient windows that qualify for this program.
 - Regency® and Regency® 400 Series windows with select EnergyPlus™ or Solar Shield glass packages that are designated as ENERGY STAR® Most Efficient can meet the GreenOn Rebates requirements. Consult with your contractor to determine the best glass package for your home and climate zone.
 - The rebate applies for each rough opening; a bay or bow window with more than one glass unit qualifies for one rebate.
3. The contractor will submit your GreenOn Rebates application on your behalf.

IMPORTANT: The windows' ratings stickers/labels are required as part of the GreenOn Rebates application. By law, Gentek is not able to reprint stickers; your contractor must keep the stickers/labels when they are removed from your windows.
4. After you validate that the window installation has been completed, submit your proof of purchase and you will receive your rebate cheque in the mail in approximately 8-12 weeks.

Maximize Your Energy Savings Year-Round

High-performance Regency and Regency 400 Series windows can reduce energy loss, condensation and outdoor noise, making your home more comfortable with less energy spending for heating and cooling. New energy-efficient windows can also increase the resale value of your home, while enhancing the appearance inside and out.

Questions?

Ask your Gentek window dealer or contact GreenON Support at 1-888-728-8444 or email info@GreenON.ca to get impartial answers to your window questions from the GreenOn energy experts.
