GENTEK®
GENTEK BUILDING PRODUCTS

For more than 50 years,

Gentek Building Products has been the premier choice for beautiful products, impeccably built. Our wide array of materials, profiles, colours and finishes expertly achieve high-performance design with easy-care simplicity – exactly what today's homeowners are looking for. When it comes to choosing the best materials for your next project, you can depend on Gentek for quality and style like no other.

For trim, accessories, gutter coil and other product information, please see the detailed Gentek Product Directory.

Gentek siding, windows, doors and trim accessories bring easy living to the forefront. The premium appearance provides the beauty of freshly painted or stained wood but without the worries of rotting, splitting, warping or insect damage. This extensive product collection offers every "must have" for upscale style in a virtually maintenance-free home exterior.

THE BEAUTY OF SUPERB CRAFTSMANSHIP

Featuring best-in-class materials and cutting-edge technology, Gentek products are performance-engineered to beautifully withstand harsh weather elements, including pounding rain, high winds, intense heat and frigid cold. And thanks to fade-defying colour formulations, our darker sidings provide superior colour retention and resistance to weathering – ensuring the luxurious finish stays true.

FUTURE-FORWARD AND VALUE-RICH

For most people, a home is a source of pleasure and pride, as well as an important investment. Gentek products not only will create an attractive finish, they will heighten the home's curb appeal as well. And in today's resale market, a beautiful, low-maintenance exterior can be a valuable amenity.

GENTEK SETS THE STAGE FOR SUCCESS!

Choosing just the right products, profiles and colours makes it possible to reveal each home's perfect potential. Horizontal, vertical and specialty siding are just the starting point. Beautiful new windows, doors, rainware, decorative trim accents and more complete the picture. Gentek also offers a full selection of building envelope products, tools and equipment to streamline your projects with simplicity and ease.

3

Design inspiration starts here.

The power of colour is undeniable when creating a beautiful home exterior. From sublime palettes in monochromatic tones to bold contrasting architectural hues, colour defines the design. Gentek products are available in a grand scale of colourful options that let you tailor the look with signature style.

SIDING WITH PERFECTION

Perfection? It's never too much to ask. Our Colour Clear Through system makes it easy to find the perfect colour match for your exterior designs. This exclusive selection of customer-preferred colours ensures that all Gentek products – siding, soffit, fascia, trim and rainware – will beautifully match throughout our vinyl, aluminum and steel product lines.

There's no need to settle for siding and trim that *almost* match. With our special Colour Clear Through palette, you can depend on a consistent match through and through.

CHOOSE DARKER COLOURS WITH CONFIDENCE

Richer, more resilient colours. A luxurious, low-luster finish with a depth of visual appeal. Enduring beauty and performance. Gentek vinyl siding has never been better – thanks to ChromaTrue® fade-defying colour technology.

This advanced copolymer compound fortifies our darker colour sidings with superior colour retention and protection from the elements, including exposure to intense sun and heat, pounding rain, saltwater and chemicals. ChromaTrue also provides a highly weatherable finish that stands up strong to dings and abrasions.

CUSTOM-PAINTED WINDOWS

Regency 400 Series and Regency window exteriors can be custom painted to match any of our trim colours, allowing you to achieve a truly upscale appearance for your exterior design. Regency 400 Series interior colour is extruded Nordic White, while Regency interior colour choices are extruded White and Beige, or an optional Dark Oak Woodgrain laminate.

Matching Accents
Door trim, porch railing and other exterior accents can be painted to match your Gentek siding and windows. Gentek proudly offers Dulux exterior paint for all of Gentek's most popular colours. Please note that paint colour codes are formulated for Dulux paint only.

ChromaTrue®

Featuring richer, darker colours fortified with ChromaTrue technology, Gentek-brand vinyl siding carries a lifetime limited warranty against fading.

BEFORE

AFTER

GENTEK VISUALIZER

Take your renovation projects to the next level with the Gentek Visualizer. This easy-to-use program lets you upload a photo of your customer's home and view "before and after" shots featuring a variety of colour schemes that showcase your renovation ideas.

- Design-ready with a gallery of house images; access it from any mobile device and start designing
- Custom "photo-realistic" option – upload a photo of your customer's home and simply outline the roof and walls and apply products to the photo (our design team also can professionally prep the photo for you)
- Pre-selected Gentek product and colour combinations for easy design selection
- Save your preferred products, colours and designs – everything is listed and ready to go

Visit gentek.ca and click on the Gentek Visualizer to explore design options for your next project.

FREE DESIGN ADVICE – JUST FOLLOW THE BLOG

Whether you want to simply refresh the appearance of a home – or press the reset button – Gentek is here to help! Just follow our MyDesign Home Studio blog at mydesignhomestudio.com to enjoy a wide range of design tips and renovation ideas, as well as a question and answer portal offering professional design advice for any project.

And ask your Gentek Sales Representative about our Gentek RenoPro Software that can be personalized for your business.

EnFusion®

ULTRA-PREMIUM INSULATED VINYL SIDING

Product Specifications:
Nominal Thickness: Vinyl panel .046"
Windload: Laboratory tested to withstand windloads up to Category 5 Hurricane rating
Texture: Cedargrain
House shown in Canyon Clay.

Classic Colours

Snow White	Canyon Clay	Dover Gray
Almond	Pebble	Storm **NEW!**
Wicker	Sage	Chesapeake Gray **NEW!**

Designer Colours

Dark Drift	Rockwell Blue **NEW!**	Hudson Slate **NEW!**
Meadow Fern **NEW!**	Midnight Surf	Windswept Smoke
Moonlit Moss		

THE NEW STANDARD IN QUALITY AND ENERGY SAVINGS

Energy-Smart Design Custom-contoured expanded polystyrene rigid foam insulation (up to 1-1/4" thick†) helps block energy loss year-round.

Greater Impact Resistance Up to 400% more impact resistance than conventional "hollow back" siding.

Superior Perm Rating of 5 Allows insulation to breathe and moisture to escape, not get trapped inside.

Full-Roll Nail Hem Heavy-duty, double-thick wall attachment increases strength and structural integrity.

Built Hurricane-Tough! Laboratory tested to withstand winds up to Category 5 Hurricane rating.

Beautiful Wood-Like Appearance Natural cedargrain texture and low-gloss finish for subtle elegance.

Longer Panels The extra-long 16'8" and 16'4" panel lengths create fewer overlaps for a superior finished look.

†Nominal.
Not all profiles are available in all colours.

INTELLIGENT SIDING SOLUTIONS

A fusion of beauty and strength, Sequoia Select EnFusion helps prevent energy loss to keep your home warm and cozy in the winter and refreshingly cool in the summer – with less energy spending. The laminated, rigid foam insulation is contoured to fill the gap between the siding and your home to provide superior energy efficiency. This protective layer also conceals imperfections in the underlayment to ensure smooth wall lines and an upscale appearance.

WOODGRAIN™ 2000
ALUMINUM SIDING

VERSATILE PROFILES

Warm and welcoming, Woodgrain 2000 combines the traditional beauty of hand-cut wood siding with the high-performance properties of aluminum. Each heavy-duty panel is coated with a specially formulated Poly finish to create a resilient exterior that will maintain its beautiful appearance year after year despite exposure to harsh weather elements.
House shown in Bright White.

Dark Cherry	Light National Walnut	Table Walnut

DIZAL
DIGITALLY PRINTED ALUMINUM SIDING

DISCOVER THE NEW BEAUTY OF ALUMINUM!

Featuring high-definition photographic reproductions of textures and colours, Dizal aluminum siding offers a remarkably realistic wood appearance in a premium aluminum panel.

Future-forward Dizal aluminum siding incorporates four high-performance layers: extra-thick aluminum panel, primer coat for adhesion, HD digital reproduction, and a UV-barrier clear coat.

- Creates the look of real wood without the work of real wood
- Plank profiles in 4", 6" and 8"; length is 16'
- Planks install vertically and horizontally; quick and easy installation
- Available in a wide variety of textures and colours
- Non-corrosive, non-combustible

Versetta Stone®

The beauty of stone, the simplicity of siding™

THE SIGNATURE LOOK OF STONE

Create the high-end style of traditional stone masonry but without the excess cost and installation time. Versetta Stone combines handcrafted beauty with modern practicality in a non-structural, cement-based panelized stone veneer.

INTERIOR
EXTERIOR
APPLICATIONS

- Cast in moulds and hand-coloured with iron oxide pigments to replicate natural stone shapes, textures and patterns
- Lightweight and easy to install with tongue and groove interlocking system; installs in any weather
- Designed to effectively manage moisture to help prevent mold growth
- Ideal for exteriors, interiors, new construction and remodel projects
- Tested and approved to rigorous building standards
- NAHB Green Approved Product

Choose from Ledgestone or Tight-Cut profiles in a variety of colours.

UPSCALE ELEGANCE WITH ORGANIC APPEAL

Expand your design options with beautiful replica-wood Sagiper panels. Ideal for a variety of interior and exterior applications, the tongue-and-groove corrugated PVC planks are wrapped in a high-quality exterior vinyl coating that's virtually maintenance-free.

INTERIOR EXTERIOR APPLICATIONS

- Applications include exterior cladding, soffits, covered decks, front veranda areas, interior ceilings (basements, bathrooms, coffered ceilings), interior walls and more
- Highly durable and easy to clean – even graffiti is easily removed
- Class A fire rating – CAN/UL S102.2 tested; less than 25 flame spread rating
- Water absorption 0.04% – perfect for high humidity areas and near the coastline where sea spray can cause corrosion to exterior metals and woods
- Impenetrable to insects
- Absorbs more than 97% UV radiation, increasing the longevity of the PVC core
- Available in standard and special order colours

Distinction
Architectural Steel Siding

HIGH-PERFORMANCE STEEL SIDING WITH VARIEGATED WOOD BEAUTY

In Distinction siding, you have found a premier exterior cladding that beautifully merges the protective strength of steel with the organic visual appeal of wood. The 12' panel system features a pre-notched anchor band and concealed fasteners for installation ease.

Design-inspired and impeccably crafted, Distinction siding adds value and elegance to any home by wrapping the exterior in a robust steel shield.

- Heavy-duty 26 gauge steel construction
- Premium paint system over G90 galvanized steel or Galvalume provides long-term durability and rust prevention
- Resilient, UV-resistant paint prevents discolouration and cracking
- Installs vertically or horizontally; panels lock together on four sides
- Choose from a variety of colours in the Wood Series, Nuanced Wood Series or Granite Series

SIERRA STEEL™

Steel Siding with Kynar® PVDF
Colour Palette

Bright White	Dover Gray
Chelsea Bluff	Storm
Monterey Sand	Iron Ore
Delray Sand	Rockwell Blue
Thistle	Watermill Blue
Sable	Taylor Red
Juniper Grove	

Impact Resistant Constructed of roll-formed 29 gauge Galvalume AZ-50 steel for maximum resistance to hail damage and denting.

Built Weather-Tough Rugged steel construction is virtually impervious to outdoor elements. Unlike wood, compressed particleboard or fiber cement, it won't absorb moisture. Steel siding also resists warping, chalking, fading and brittleness in cold weather; independently tested to withstand hurricane-force winds, with wind speed exceeding 257 km/h (160 mph).

Smooth, Straight Wall Lines Rigid steel panels deliver high dimensional stability and resist buckling and the wavy appearance that can result from expansion and contraction caused by extreme weather changes.

Upscale Appearance Deep 1/2" panel projection creates greater dimension and style with bold edges and dramatic shadow lines. The resilient PVDF finish resists dirt and dust buildup, staining and mildew.

Carefree Maintenance No need for time-consuming painting or scraping. Just a simple rinse with a garden hose will remove most airborne dust and dirt.

Environmentally Friendly! Steel siding is 100% recyclable, requires no additional painting or caulking and does not produce silica dust during installation.

Insect Resistant Resists damage from wood-eating insects, such as termites.

LUXURY'S NEW LOOK – THE BEAUTIFUL STRENGTH OF STEEL

Distinguished for its superb durability and versatile design possibilities, metal is on the rise as a prime exterior cladding. Premium raw materials and cutting-edge technology merge with skilled craftsmanship and artistry to achieve the outstanding quality of our Sierra Steel siding. Each panel is virtually "weather-sealed" with a resilient Kynar PVDF coating, a high-performance fluoropolymer resin with a luxurious low-gloss finish.

House shown in Iron Ore.

REGENCY® 400 SERIES
VINYL REPLACEMENT WINDOWS

NEXT-GENERATION ENERGY EFFICIENCY

With meticulous attention to every detail, Regency 400 Series merges modern style with best-in-class technology to achieve superior energy efficiency, enduring beauty, easy upkeep and excellent value.

ENERGY STAR

Gentek windows feature a variety of insulated glass options to meet the latest ENERGY STAR performance requirements.

SUPERIOR PERFORMANCE IS INHERENT IN THE DESIGN

Energy-engineered Regency 400 Series replacement windows are expertly crafted to improve the energy efficiency of a home while enhancing its appearance with an upscale, contemporary look. The superb construction features an extra-strong 4-1/2" thick fusion-welded frame with the sash positioned closer to the interior part of the wall for increased thermal protection.

- Heavy-duty 4-1/2" welded rigid vinyl multi-chamber frame construction
- Welded sashes with triple weatherstripping for superior insulation
- 7/8" thick double-glazed glass units with Low-E, argon and Super Spacer® structural foam spacer (standard)
- Triple-glazed units up to 1-3/8" thick Low-E and argon or krypton for ultra energy efficiency (optional)
- EnergyPlus™ and Solar Shield glass packages available
- Environmentally friendly – designed for superior thermal performance and a smaller carbon footprint
- Contemporary sash for a modern look

GENTEK.

Regency

HIGH-PERFORMANCE WINDOWS

ENERGY-SAVING SOLUTIONS DESIGNED FOR NORTHERN CLIMATES

For many homeowners, conserving energy and reducing fuel costs is a primary reason for purchasing new windows – and that's why maximum thermal efficiency is at the core of our Regency window design.

EXCEPTIONAL STRENGTH, ENDURING STYLE

Precision-engineered for outstanding thermal efficiency, Regency windows incorporate several best-in-class features to ensure an exceptionally strong and weathertight fit, as well as advanced energy savings and a markedly refined appearance.

- Fusion-welded masterframe and sash corners
- Beveled exterior masterframe accommodates various installation methods and architectural styles
- Metal-reinforced sash
- Double-glazed EnergyPlus glass with Low-E, argon gas and Super Spacer structural foam spacer
- Double- and triple-glazed glass EnergyPlus and Solar Shield glass packages available

CREATE CUSTOM APPEAL

- Choose from extruded White and Beige, 20 standard exterior paint colours and a variety of custom hues
- Interior colours are extruded White or Beige; an optional Dark Oak laminate is available in select window styles
- Decorative grids and specialty glass
- Jamb extensions, brickmoulds and installation accessories

80 Series

FUSION-WELDED VINYL WINDOWS

DESIGNED FOR YEAR-ROUND ENERGY SAVINGS

Featuring a premium vinyl construction, fusion-welded technology and high-performance glass, 80 Series windows will exceed your every expectation for energy efficiency, quality and value.

Available only in **WESTERN CANADA**.

STYLISH AND STRONG

In 80 Series, you have discovered a window that will increase the energy efficiency of a home while enhancing its appearance, inside and out. Heavy-duty vinyl frames and sashes, multi-chambered extrusions and high-performance insulating glass achieve outstanding energy efficiency. Together, with its superior durability and structural integrity, this premiere vinyl window is as strong as it is beautiful.

• Fusion-welded frame and sashes
• Sturdy 3-3/8" frame depth
• Also available in 1" set back nail fin and stucco flange options
• 1" thick insulated glass unit with Intercept® warm-edge spacer; optional structural foam spacer
• Side-load sash design (single hung windows) and removable fiberglass screens for easy cleaning
• Metal reinforcement in the meeting rails for increased strength and rigidity
• Choose White, Almond and Desert Clay, or a Bronze exterior with White interior

INSTALLATION EASE

80 Series windows come standard with a 1-3/8" nail fin. For enhanced appearance and ease of installation, three additional options – 1" set back nail fin, stucco fin and a block frame – also are offered.

1-3/8" Nail Fin (standard)   1" Set Back Nail Fin   Stucco Fin   Block Frame

70 Series
FUSION-WELDED VINYL WINDOWS

IMPRESSIVE PERFORMANCE

Our 70 Series windows will add the perfect touch of refinement to any home with their quality construction, enduring good looks and low-maintenance features.

Available only in **WESTERN CANADA**.

BEAUTIFUL, DURABLE AND ENVIRONMENTALLY FRIENDLY

Gentek 70 Series windows deliver a weathertight fit for increased energy savings year-round, while enhancing the appearance of a home inside and out.
• Fusion-welded vinyl frame and sashes
• 2-5/8" frame depth for multiple applications
• 3/4" thick insulated glass unit
• Intercept spacer or optional structural foam spacer
• Metal reinforcement in the meeting rails for increased strength
• Available in White, Almond and Desert Clay

AMHERST™
VINYL REPLACEMENT WINDOWS

ENERGY-SMART AND VALUE-PRICED

Amherst windows combine beauty and energy efficiency with everyday affordability. The fusion-welded masterframe and sashes and high-performance glass system together create a strong thermal barrier against energy loss.

QUALITY DESIGN AND CONSTRUCTION

Built in the tradition of quality, Amherst windows deliver impressive performance and energy efficiency, as well as beauty and value.
• Fusion-welded frame and sashes
• Energy HSG insulated glass unit with Intercept spacer system
• Interlocking composite-reinforced sash meeting rails
• Bulb seal at the meeting rails
• Beveled exterior profile and sloped sill
• Available in White and Beige

VINYL SIDING AND SOFFIT ARCHITECTURAL SPECIFICATIONS

Produced to precise tolerances using formulated compounds specifically designed for the plastic building products industry according to ASTM D4216, meeting or exceeding the following:

Property	ASTM Test	Results
Tensile Strength (psi)	D-638	6,700
Modulus of Elasticity (psi)	D-638	410,000
Izod Impact (70°F)	D-256	3.6 (ft-lb/in of notch)
Izod Impact (32°F)	D-256	2.0 (ft-lb/in of notch)
Flexural Strength (psi)	D-790	14,000
Coefficient of Linear Expansion	D-696	5.3×10^{-5} (mm/mm °C) 2.9×10^{-5} (in/in °F)
Deflection Temperature Under Load 264 psi (°C)	D-648	73

PRODUCT PHYSICALS:

All siding products, soffit panels and accessories are made with solid colour throughout. The siding products and accessories meet or exceed the ASTM Specification for Rigid Poly Vinyl Chloride (PVC) Siding D3679. All soffit products and associated accessories meet or exceed the ASTM Specification for Rigid (Unplasticized) Poly Vinyl Chloride (PVC) Soffit D4477.

The siding and soffit compound meets Class 2 requirements and conforms to weathering performances as described in ASTM 3679.

Colour: Spectrophotometer controlled
Gloss: Gardner gloss meter controlled
Lock: Dimensionally controlled

All products meet or exceed ASTM 3679 thickness (nominal) requirements:

Sequoia Select EnFusion	0.046"
Sequoia Select	0.046"
Sequoia Select Variegated (except Board & Batten)	0.046"
Northern Forest Elite	0.046"
Board & Batten	0.048"
Fair Oaks	0.044"
Concord	0.042"
Driftwood II	0.040"
Sequoia Select Ultra-Premium Soffit	0.044"
Oxford Premium Soffit	0.042"
Beaded Premium Soffit	0.042"
Fairweather Soffit	0.040"

WARRANTY:

All Gentek vinyl siding brands carry a Lifetime Limited Warranty including fade and hail protection. *Warranty is transferable if the home is sold. See printed warranty for complete details.*

SOFFIT VENTILATION AREA:

Gentek soffit panels are designed to allow air circulation into the attic areas to aid in the reduction of excessive heat buildup and water vapor condensation. The net free open area (NFOA) per lineal foot of soffit is as follows:

12" Sequoia Select Hidden Vented	10 sq in
10" Oxford Fully Vented	5.3 sq in
8" Beaded Vented	2.4 sq in
12" Fairweather Center Vented	2.3 sq in
12" Fairweather Fully Vented	7.1 sq in

FIRE RESISTANCE RATINGS:

Gentek vinyl siding products meet or exceed all building code requirements throughout the United States and Canada. In addition to meeting these code requirements, Gentek vinyl sidings have been fire rated by Underwriters Laboratories (UL) to be used in one-hour rated designed walls U026 and U032 and a two-hour rated wall, U301. UL inspects the manufacture of the vinyl products quarterly to certify that Gentek vinyl products are manufactured consistently. The vinyl products have been tested as follows:

Property	ASTM Test	Results
Average Burn Distance	D-635	20mm
Average Burn Time	D-635	<5 seconds
Flash Ignition Temperature	D-1929	752°F
Self Ignition Temperature	D-1929	860°F
Flame Spread Index	E-84	15
Smoke Developed Index	E-84	<400
Fire Resistance	E-119	1-hour rated* 2-hour rated*

*See UL Fire Resistance Directory Control No. 1N60. E-119 is equivalent to UL-263 and E-84 is equivalent to UL-723.

Important fire safety information for the building trades, specifiers, professionals and do-it-yourself installers:
When rigid vinyl siding is exposed to significant heat or flame, the vinyl will soften, sag, melt, or burn and may thereby expose the material underneath. Care must be exercised when selecting underlay materials because many underlays are made from organics that are combustible. You should ascertain the fire properties of any underlay prior to installation. All building materials should be installed in accordance with local, state and federal building codes and fire regulations.

WINDLOAD PROPERTIES:

All Gentek siding products are designed to withstand a minimum of 100 mph windloads and are suitable for most areas. The products can be used in areas with higher windloads, but installation procedures, choice of product and building code jurisdiction are important factors to be considered. The windspeed rating (in mph) is calculated using VSI's windspeed calculation guidelines. Additional information is available if required.

BUILDING CODES:

Gentek vinyl products meet or exceed the following building code specifications:
ICC-ESR – 1133
CCMC – 06541-L
New York City MEA 132-94-M
FHA/HUD Minimum Property Standards

For architectural specifications of designer siding and other products, please see your local Gentek dealer.

ARCHITECTURAL SPECIFICATIONS

ALUMINUM SIDING
ARCHITECTURAL SPECIFICATIONS

ALUMINUM METAL PROPERTIES:
Alloy or equivalent AA3000
Specific Gravity 2.72
Modulus of Elasticity (ksi)...10,000
Melting Range (°F) 1175-1210

COATING PROPERTIES: Gentek aluminum products are manufactured with AA3000 series alloy (or equivalent). Both sides of the aluminum are cleaned with a specially formulated cleaner. The cleaned aluminum is then treated with an acid solution containing chrome to enhance corrosion resistance and coating adhesion.

Plastisol (Poly) Topcoat: The topside of the pretreated aluminum is coated with a thermoset polyester polymer which is dried and cured at about 450 °F., forming a hard but flexible and weatherable coating. Total coating thickness is approximately 18 micrometers.

Plastisol (PVC) Topcoat: This highly weatherable, flexible, chemical-resistant thermoplastic polymer is melted and fused on the aluminum metal at temperatures of 390°F. The coating is applied either with a striated pattern or smooth finish having an average film thickness of 3.0 mils.

Fluoropolymer (PVDF$_2$): This thermoplastic polymer has excellent chemical and fade resistance. The coating is applied at 0.9 mil. The system is cured at a minimum temperature of 475°F. This polymer system conforms to the high industry standards of Kynar 500® and Hylar 5000®. The main criteria for these standards is that the paint formulation must contain a minimum of 70% PVDF2. Many fluoropolymer coatings on the market do not meet the high quality and performance standards required by Kynar 500 and Hylar 5000 specifications.

WEATHERING AND TESTING: Gentek products are tested for superior adhesion and forming properties. Gentek's stringent colour specifications allow batch to batch mixing of product. Product testing includes colour, film thickness, gloss, hot water/impact test, freezer/impact test, salt spray, humidity testing (1000 hours) and outdoor exposure (2 years).

COMPLIANCE: All Gentek soffits comply with CAN/CGSB-93.2-M91. In addition, the aluminum alloys used meet the ULC Standard CAN4-S114-M80, defining the noncombustibility of aluminum alloys.

WARRANTY: 40 Year Limited Warranty. Warranty is transferable.

CONTACT WITH DISSIMILAR MATERIALS AND CORROSIVE ENVIRONMENTS:
Direct contact of aluminum products with certain dissimilar materials, or contact with water runoff from dissimilar materials, is likely to result in corrosion. Accordingly, care should be taken during installation to avoid such contact of aluminum with dissimilar materials, including: dissimilar metals (copper, zinc, steel, etc.), concrete, stucco, asbestos siding, pressure treated/pretreated lumber, masonry, corrosive non-metallic materials, and roofing materials or roofing systems containing metallic granules or strips. Seacoast or other corrosive environments may result in corrosion of the product.

NOMINAL GAUGES (mm):

Product	Gauge
8" Horizontal	0.53
D4 Dutch	0.40
D4	0.40 & 0.44
8" Vertical Board & Batten	0.50
Vertical "V"	0.40
16" Soffit – 2 Panel	0.29 & 0.38
16" Soffit – 4 Panel	0.29 & 0.38
18" Soffit – 3 Panel	0.33
4" Fascia – rib	0.44
6" Fascia – rib & non-rib	0.44 & 0.50
8" Fascia – rib & non-rib	0.44 & 0.50
Gutter Coil	0.57, 0.66 & 0.79

SOFFIT VENTILATION AREA:
Gentek soffit is available in a variety of profiles. Vented panels are designed to allow air circulation into the attic areas to aid in the reduction of excessive heat build-up and water vapour condensation. Gentek soffit conforms to CCMC 12860-L.

PROFILE	PER LINEAR FOOT	PER PANEL
16" – 2 panel	4.02 sq in (26.0 cm^2)	48.8 sq in (314 cm^2)
16" – 4 panel	4.12 sq in (26.6 cm^2)	66.6 sq in (429.7 cm^2)
18" – 3 panel	5.46 sq in (32.2 cm^2)	78.5 sq in (506.5 cm^2)

VENTILATION: Fully vented

STEEL SIDING
ARCHITECTURAL SPECIFICATIONS

METAL PROPERTIES:

Steel or Equivalent	AZ-50
Specific Gravity	7.8
Minimum Ultimate Strength (KSI)	45-55
Minimum Yield (KSI)	40-50
Minimum Elongation (%)	25-35
Modulus of Elasticity (KSI)	29,500
Coefficient of Thermal Expansion (in/in °F)	0.000006
Melting Range (°F) Steel	>2700
Melting Range (°F) Zinc	786
Thermal Conductivity at 77°F (btu-in/ft^2-hr-°F)	555

COATING PROPERTIES:
Gentek steel siding products are manufactured with AZ-50. Both sides of the steel sheet are cleaned with a specially formulated cleaner, water rinsed and then coated with an environmentally safe chemical pretreatment to enhance corrosion protection and coating adhesion.

The pretreated surface is coated with a thermoset corrosion-resistant polymer. This corrosion-resistant polymer is topcoated with the following polymeric systems:

Plastisol (PVC) Topcoat: This highly weatherable, flexible, chemical-resistant thermoplastic polymer is melted and fused at temperatures of >390°F. The coating is applied with a striated pattern or smooth finish having an average film thickness of 3.0 mils.

Fluoropolymer (PVDF$_2$): This thermoplastic polymer has excellent chemical and fade resistance. The coating thickness is 0.9 mil. The system is cured at a minimum temperature of 475°F. This polymer system conforms to the high industry standards of Kynar 500® and Hylar 5000®. The main criteria for these standards is that the paint formulation must contain a minimum of 70% PVDF$_2$. Many fluoropolymer coatings on the market do not meet the high quality and performance standards required by Kynar 500 and Hylar 5000 specifications.

WARRANTY:
All Gentek steel siding brands carry a Lifetime Limited Warranty. *Warranty is transferable if home is sold. See printed warranty for complete details.*

CONTACT WITH DISSIMILAR MATERIALS:
Direct contact of steel products with certain dissimilar materials, or contact with water runoff from dissimilar materials, is likely to result in corrosion. Accordingly, care should be taken during installation to avoid such contact of steel with dissimilar materials, including: dissimilar metals (copper, zinc, steel, etc.), concrete, stucco, asbestos siding, pressure treated/pretreated lumber, masonry, corrosive non-metallic materials, and roofing materials or roofing systems containing metallic granules or strips.

PRODUCT PHYSICALS:

Product	Coating Type	Thickness*
Sierra Steel	PVDF$_2$	0.017
SteelSide	PVC	0.017
Universal	PVC	0.017

*29 Gauge

BUILDING CODES:
Gentek steel products meet or exceed the following building code specifications:

ICC-ES Legacy – Report #97-64
AAMA 1406-86
FHA/HUD Minimum Property Standards

BETTER PRODUCTS FOR A BRIGHTER FUTURE

You may not realize it, but building green begins long before the materials are ready for installation on a home. It begins with a firm commitment to "source reduction" by the manufacturer, ensuring all aspects of production are designed to help reduce the volume and environmental impact of waste, while also achieving optimum material use to create products with a longer service life.

• Eco-friendly and sustainable, Gentek vinyl siding and windows help conserve natural resources often used for home construction, such as cedar and other wood. And because vinyl never needs to be painted, it helps prevent paint, stain and other maintenance-related materials from entering the waste stream.

• All Gentek aluminum siding is produced from material that is at least 90% recycled aluminum. At the end of its long useful life, aluminum siding is 100% recyclable.

• Unlike some building materials, such as fiber cement, steel siding is a recyclable material and has long been North America's most recycled material![1] It also promotes energy conservation by creating a tight building envelope for more efficient heating/cooling performance year-round.

SERVICE AND SELECTION ABOVE ALL

At Gentek, we appreciate the often-challenging schedule of the building products professional. That's why we do our very best to stock our supply centres with everything you need to get the job done efficiently and with beautiful results. Our knowledgeable and friendly staff is readily available to fill your orders, process special requests, offer solutions and assist with whatever you need.

VALUABLE WARRANTY PROTECTION

Gentek delivers the confidence and value only a true leader can provide. We proudly stand behind our products with the full faith of our more than 50 years of manufacturing expertise and some of the strongest warranties in the industry.

For complete warranty information, including limitations, ask your dealer for a copy of the Gentek-brand product warranties. Warranty information for specialty sidings and third-party products can be found on their respective websites.
