We believe inspiring architecture is a powerful force that positively impacts people and communities.

Incorporating our sustainable products into exhilarating architectural designs has a positive impact on the world.

LONGBOARD[®]
ARCHITECTURAL PRODUCTS

WHO DO YOU TRUST

- *With your designs?*
- *With your home?*
- *With your project?*
- *With your reputation?*

Your clients rely on you to provide the best advice, the best service and ultimately the best results. At Longboard, we understand the important role you play which is why we are committed to Radical Client Care.

Radical Client Care at Longboard means top quality products, reliable technical advice, human-centered support and timely guidance before, during and after your projects.

We understand sometimes things don't go as planned. We are thoroughly committed to ensuring your experience with Longboard is a positive one. We stand behind our products, our staff, our services and most importantly; our clients.

FAQ

- Longboard is made from single-sourced extruded aluminum
- All aluminum is extruded in-house in our manufacturing plant located in British Columbia, Canada
- Products available for order in 12 or 24ft lengths
- 3-6 Business Day Production Lead Time
- Longboard products are safe for both interior and exterior use
- Custom Color matching is available upon request
- Tongue & Groove material can be installed both vertically, and horizontally
- 15-20 year warranty options
- 2604/2605 certified powder coating facility
- Class A Fire Rating
- 40+ On-Demand Finish Options

Exterior Spaces

All of our exterior products and systems are powder coated with AAMA 2604/2605 certified powder. This means that you are ensured to have high quality material that will hold up against the exterior elements, including corrosion and UV rays. All Longboard materials are created in-house, starting from the aluminum extrusion and ending with the finishing touches, packaging and shipping to site. Explore our different systems and contact us with any questions you have.

- AAMA 2605 Certified Facility
- 100% Extruded Aluminum
- Non-Combustible
- Weather-Resistant
- Maintenance-Free
- Over 40 available finishes
- 100% Recyclable
- Earn LEED Credits
- 3-6 Business Days
- Radical Client Care
- VOC Free

Ceiling System

Amazon Headquarters - Vancouver, BC
Architect: B+H Architects
6" V Groove Light National Walnut

A photograph of a modern interior space. The ceiling is made of horizontal wood slats. A recessed light fixture is visible in the ceiling. Below the ceiling, there are glass walls and doors. The glass has a decorative pattern of vertical lines and wood grain. In the foreground, there are several black metal bike racks. The floor is made of light-colored tiles.

We are building a sustainable future.

All Longboard products are 100% recyclable, VOC and LBC red list free, made using a chrome-free pretreatment, manufactured using hydro-electric power, and can help earn LEED credits.

Our water filtration system ensures that any water used in the manufacturing and pretreatment process is returned clean to the environment.

We provide architects, designers, and builders a sustainable option in reducing embodied carbon, supports LEED certification, and makes achieving net-zero emissions attainable.

LONGBOARD ECO™

Our Longboard ECO™ suite of products contain at least 50% recycled aluminum. Manufacturing these products results in less greenhouse gas emissions and generates less than 50% of industry average embodied carbon.

These products meet the same strict quality benchmarks as our standard line of products, are offered with the same robust warranties, and possess verified life cycle impact analysis (LCIA) and environmental product declarations (EPD).
