

ALIGN™

COMPOSITE CLADDING

THE *beauty* OF REAL WOOD, BUT WITHOUT THE UPKEEP.

THIS CLADDING
CHANGES EVERYTHING.

 GENTEK®

ALIGN COMPOSITE CLADDING HAS ARRIVED – AND THERE'S NOTHING ELSE LIKE IT.

IT'S THE DETAILS THAT MAKE IT BEAUTIFUL.

Deeper grain embossing, ample 7" plank exposure and bold, crisp shadow lines achieve a remarkably realistic appearance of natural wood. You'll have to touch it to tell the difference.

IT'S THE SCIENCE THAT MAKES IT DIFFERENT.

Here you will find something never seen before but destined to change the future of exterior cladding. Our (GP)² Technology[®] optimizes the performance and durability to ensure high-end aesthetics with exceptional quality and value.

FUTURE-FORWARD HOME EXTERIORS.

There's nothing ordinary about ALIGN. As the world's first composite cladding incorporating Glass-Reinforced Polymer and Graphite-Infused Polystyrene (GP)² Technology, ALIGN meets or exceeds performance test standards to provide every "must have" for style, strength, durability and easy upkeep.

When you compare ALIGN with other exterior cladding, you'll see why it's the best choice for your home.

- Better overall value – the realistic look of wood, but without the costly upkeep of repainting year after year.
- Strong yet lightweight construction that's easier to install than fiber cement, wood or other engineered-wood products. No potential health hazards from silica dust.
- Performance-engineered to resist high winds, moisture, flame spread/smoke development, and impact damage from dents, dings or abrasions.
- Fortified with weatherable pigments to ensure superb color retention, including darker hues.

SUPERIOR AESTHETICS, QUALITY AND VALUE – EVERYTHING PERFECTLY ALIGNS IN THIS INNOVATIVE COMPOSITE CLADDING FROM GENTEK.
