NOT INTENDED FOR USE IN SINGLE LAYER APPLICATIONS

Minimum order quantities and extended lead-times may apply. To minimize the effects of thermal bridging, Atlas Roofing Corporation strongly recommends the use of multiple layers when the total desired or specified R-value requires an insulation thickness greater than 2.7" thick. LTRR values were determined in accordance with CAN/ULC-S770-09.

Minimum order quantities and extended lead-times may apply. To minimize the effects of thermal bridging, Atlas Roofing Corporation strongly recommends the use of multiple layers when the total desired or specified R-value requires an insulation thickness greater than 2.7" thick. LTR values were determined in accordance with CAN/ULC-S770-09.

NOT INTENDED FOR USE IN SINGLE LAYER APPLICATIONS

Made to Order: Extended lead-times may apply. To minimize the effects of thermal bridging, Atlas Roofing Corporation strongly recommends the use of multiple layers when the total desired or specified R-value requires an insulation thickness greater than 2.7" thick.

<sup>1</sup>Recycled content includes GRF (Glass fiber reinforced cellulosic felt) faced polyisocyanurate foam portion only. ACFoam® CrossVent® calculations are based on 7/16" OSB unless noted otherwise. Truckload quantities based on 24 units 4x8. LTR values were determined in accordance with CAN/ULC-S770-09. Thermal resistance of unsealed air space and 7/16" OSB does not apply. Only LTR of ACFoam® polyisocyanurate portion is reported.
