BARRETT CENTRE FOR TECHNOLOGY INNOVATION

Exterior Aluminum Solutions

Longboard's exterior products are the result of years of thoughtful design, innovation, and relentless executional improvement. Our design philosophy revolves around developing quality products that effectively minimize carbon emissions and look stunning for years to come.

All our exterior systems undergo a rigorous process of applying an AAMA 2604/2605 certified powder coating. This ensures the inclusion of top-notch materials that exhibit remarkable durability against external elements, such as UV rays. From the initial stage of aluminum extrusion to the final touches of packaging and shipping, every Longboard product is meticulously crafted in-house.

Our aluminum products are subjected to various third-party testing for fire safety, thermal efficiency, wind load, product health, and environmental impact. The combination of beauty and functionality that doesn't compromise longevity or sustainability is what makes our

Aluminum Cladding, Soffit, Screens & Partitions

Complete systems, with trims & accessories designed for efficient installation.
