

**LONGBOARD®**  
INSPIRING ARCHITECTURE

INTERIOR

We offer a variety of interior products that will enhance the design and functionality of your project. Our interior products include ceilings, walls, screens, partitions, acoustical solutions, and custom solutions that are suitable for different architectural styles and needs. These products are made of extruded aluminum that is powder coated with AAMA 2604 certified powder, which ensures high quality, durability, and safety. They are manufactured without harmful chemicals and treatments, this means they do not adversely affect indoor air quality and human health. Longboard's interior products can also provide noise reduction, light reflectance, and biophilic design benefits, which can improve the productivity and well-being of the occupants. We're shaping the future of design excellence, be a part of the experience.

## Interior Aluminum Solutions

The interior design of a building not only provides aesthetic beauty, but also promotes creativity, wellbeing, and health of the occupants. Systems with acoustic benefits reduce ambient noise as well as increase energy efficiency.

The key to finding the perfect solution is finding an innovative partner who can assist in a creative and efficient manner. Your trusted partner is Longboard®. All of our interior products and systems are powder coated with AAMA 2604 certified powder.

All Longboard materials are created in-house, starting from the aluminum extrusion and ending with the finishing touches, packaging and shipping to site. Everything is VOC free, created with chrome-free processes, and 100% non-combustible.
