

## **Integrated Railing for Juliet Balcony**

- Currently under development in the testing phase.
- Designed for Studio door series
- Designed as a pre-engineered system to be installed during panel installation.
- Comprised of aluminum profiles affixed with stainless steel fasteners. Railing system is contained within the footprint of the sliding door
- Current design uses 9.5 mm heat-strengthened LAMI glass w 0.060" PVB Interlayer or 9.5mm (3/8") tempered glass
- Compatible with current screen which will remain exterior of door and railing (safety clip in place to prevent screen disengagement from track)
- Colour to match project exterior
- Minimal work on-site from interior only (no swing stage required for installation)
- Conforms to CSA A500 specifications and 2020 NBC
