Reynobond® Composite Material Stocking Color Chart

ARCONIC

Let your
boldest
visions
become
reality

For architects and builders, few things are more important than the successful execution of a bold design. That's why so many rely on Reynobond® composite material to amplify the impact of their ideas. Our lightweight, formable and colorful coil-coated finishes are available in both standard and custom finish options—opening up a world of possibilities for even your most ambitious concepts. Dramatic curves, daring angles and unique shapes come to life with eye-catching appeal and superior performance. Add easy maintenance with up to a 30-year warranty and you have a design solution that can go as far as your specifications—and imagination—require.

Bold Ideas Require Bold Finishes

Use this color chart as design inspiration for your next project. If you don't find the right shade, we're happy to produce individual custom colors upon request.

Colorweld® 500/500XL Finishes

Our coil-coated Colorweld® 500 and Colorweld® 500XL finishes offer superior performance. From vivid blues to soft, shimmering silvers, advanced resins with 70% polyvinylidene fluoride (PVDF) give these premium finishes excellent flexibility, strength and weather resistance.

Design Line™ Nature-Inspired Finishes

Inspired by Mother Nature, our Design Line™ finish system brings you a variety of striking options that mimic natural materials while providing all the performance benefits of Reynobond® composite material. These multi-layer-coat, advanced polymer finishes offer high resistance to aging, UV and corrosion that meets and exceeds their natural counterparts —delivering both beauty and brawn.

Brushed Aluminum Finishes

Sleek, contemporary and highly attractive, our Brushed Aluminum finishes combine natural beauty with high performance. They are designed to meet the aesthetics and durability requirements of exterior use to create a natural look that distinguishes your buildings.

Colorweld® 300 Finishes

Colorweld® 300 finishes offer a distinctive look across a wide range of opacities using an advanced 70% PVDF resin. Our stocked options give your buildings bright pops of red and orange, dramatic blues and blacks and sparkling metallics with finishes that are durable, colorfast and designed to withstand harsh conditions without losing their dazzling good looks.

Duragloss® Finishes

With our Duragloss® paint system, you can explore your most imaginative ideas. Its UV resistance, bright color capabilities and high-to-low gloss levels add up to a bold image with fewer maintenance costs over the life of the building.

Anodized Finishes

With Anodized Reynobond® composite material, style goes more than skin deep. The anodized layer creates a harder, smoother surface with resistance to abrasion. Our Anodized composite material is lightweight and easy to fabricate, and has a great strength-to-weight ratio.

Colorweld® 500

Series One | 2-Coat Solid Finishes | 30-year warranty | AAMA 2605

Series Two | Premium 2-Coat Mica Finishes | 30-year warranty | AAMA 2605
