**NEW - 12" SEAMLESS  
SHADOWLINE PANEL 1/2"**

# 12" Seamless Shadowline Panel

Sleek Elegance Redefined!

DETACHED

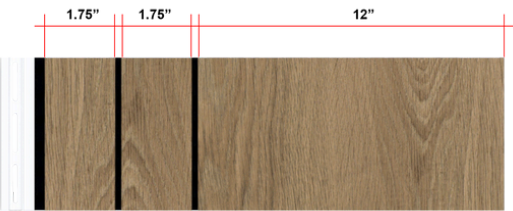

Introducing the 12" Seamless Shadowline Panel, a revolutionary addition to our product line, crafted from 100% Engineered Recycled Rigid PVC. This versatile panel is designed to be used alone for a clean, seamless look or combined with our existing Shadowline series to create unique, custom designs. The eco-friendly material not only supports sustainable building practices but also ensures durability and longevity. With its sleek, uninterrupted appearance, the 12" Seamless Shadowline Panel enhances modern architectural styles, offering both aesthetic appeal and functional strength. Transform your spaces with this innovative panel and experience the perfect blend of sustainability, style, and innovation.

## How to Combine the New Seamless Shadowline Panel with the Existing Shadowline Series:

When integrating the new 12" Seamless Shadowline Panel with our existing Shadowline series (6" Reveal, 2x3" reveals, or 6x2" reveals), placement is key to achieving the desired look. Adding an existing Shadowline Panel on the nail fin side of the Seamless Panel will result in a visible black line. However, when added to the non-nail fin side, the black line will be hidden, creating a truly seamless appearance.
