

PREMIUM CELLULAR PVC SIDING

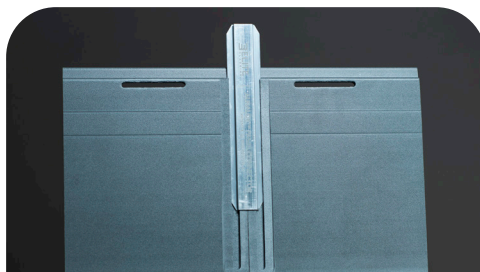

Elite Cladding® delivers high-performance siding engineered for durability, beauty, and effortless installation, powered by two breakthrough innovations: Veyros™ Technology and the AuraLok™ Panel Connector System.

Veyros™, made from Premium Cellular PVC with an advanced acrylic capstock, provides exceptional stability with minimal expansion, long-lasting color, cooler surface temperatures, and outstanding impact and UV resistance.

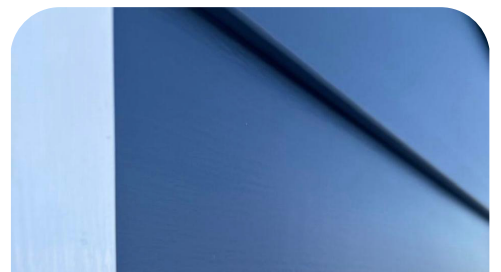

The patented AuraLok™ system streamlines installation with a seamless interlocking design, eliminating visible fasteners and creating clean, permanent, nearly invisible butt joints for a flawless, continuous exterior finish.

COLOR THAT SHAPES SPACES

Explore the full spectrum of Elite Cladding® colors, curated to elevate modern exteriors with depth, richness, and architectural character. Each shade is crafted for long-lasting vibrancy, giving you the freedom to design with confidence.

- VEYROS™ is a next-generation performance technology engineered to meet the demands of extreme climates.
- Proprietary acrylic capstock delivers 20%–50% better dark-color retention and significantly higher impact resistance than ASA.
- Advanced protection shields Elite Cladding® from UV degradation, impact damage, and color fading for long-lasting durability.
- Available in 15 trending colors.
- Offering two distinct wood-like textures across the product line.
- Lap Siding features a smooth, refined horizontal texture with subtle shadowing that creates a sleek, modern exterior look.
- Board & Batten features a dimensional vertical profile with raised battens that create strong shadow lines and a bold architectural rhythm.
